Note from the Chairperson:

Dear Friends and Neighbors,

Manchester Rotary supporting our community and ECHN! We invite you not only to play golf but more importantly to help raise awareness for this dreaded disease. The Cancer Survivorship Program at ECHN Cancer Center was created in response to Meg's desire that people with cancer, their families and their support system receive – especially after treatment is completed and the biggest obstacles begin to surface – access to programs and support that is not covered by their standard care plan, but is essential to living one's best life. In addition, funds from this golf tournament will also go directly towards the effort to get all uninsured and under insured women the tests they need to help with the early detection of breast cancer. As we know many women today live their lives without preventive screenings, like mammograms, until it's too late and the diagnosis is devastating." Together we all can make a difference.

We look forward to your support and thank you in the interim for your support for our women in our community.

Kate Sims, President
Manchester Rotary Club

Golf Day Package

October 2nd at Manchester Country Club
12:30pm Shot Gun Start – Lunch at 11:30am.
Registration opens at 11am

$150 person includes:

Benefits:
- Publicity in program
- Company sign on beverage cart.

Green or Tees Sponsor: ($100)
Benefits:
- Publicity in program
- Company on course.

An Early Detection Plan for breast cancer helps you to be proactive about your health by reminding you to perform routine breast self-exams, and to schedule clinical breast exams and mammograms, depending on your age and health history.

According to the National Cancer Institute:
- One in eight women will be diagnosed with breast cancer in their lifetime.
- Over 220,000 women will be diagnosed with breast cancer this year.
- When breast cancer is detected early (localized stage), the 5-year survival rate is 98%.
- Over 30% of women are diagnosed after breast cancer has spread beyond the localized stage.

Meg Berte' Owen Cancer Survivorship Fund

Meg Berte' Owen lost her battle from the late term effects of Hodgkin's Lymphoma cancer treatment on October 15, 2009 at the young age of 37, after first being diagnosed at age 23. For 14 years, Meg learned that patients should navigate their "survivorship path" for the rest of his or her life, and wanted others to know people with cancer can live longer and have much better lives through Survivorship.

Cancer Survivorship became Meg's passion – its the movement to reduce the late term effects of cancer treatment; to increase surveillance for recurring cancers; and to overcome physical, mental and spiritual effects the disease can permanently impose upon entire families.

Golfer Registration

Please indicate your foursome format:
☐ Scramble Format ☐ Play your own ball (include handicap below)

Golfer's Name _____

Phone_____ Email_____

☐ Payment enclosed ☐ I will not be staying for dinner.
Handicap___ or average score____ for the "play your own ball" format
