

You may know us as Manchester Memorial, Rockville General, the Women's Center for Wellness, or one of many other primary and specialty care practices east of the river. But together, we are a powerful network, bringing our combined experience and resources to over 19 communities. Together, we are investing more in state-of-the-art medical technologies, providing more convenient access to a wider range of ambulatory and health care services, and encouraging more collaboration among our hundreds of skilled doctors, nurses and specialists. Together, we are ECHN and we are here to keep you well.
